

General Guideline for winSCP setup

1. Create a new FTP site:

Protocol: FTP or SFTP

Host Name: ftp.ecode24.com

Port: 21

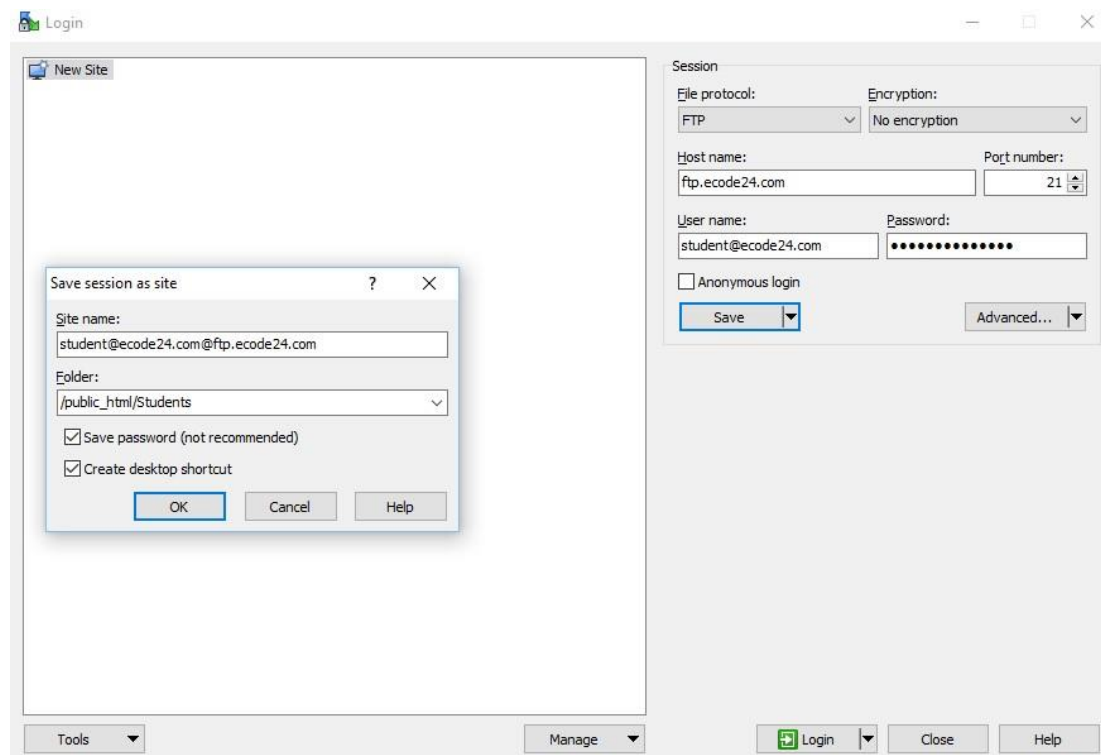

Username: student@ecode24.com

Password: Student1234\$\$\$

Then click save. A dialog for site setting will pop up.

Folder: /public_html/Students

Check save password and Create Desktop shortcut

This student account is shared. Please use with care. Do not corrupt other students' files.

- You should be brought to the FTP transaction page. Left side is your own local disk. Right side is the destination site under Students

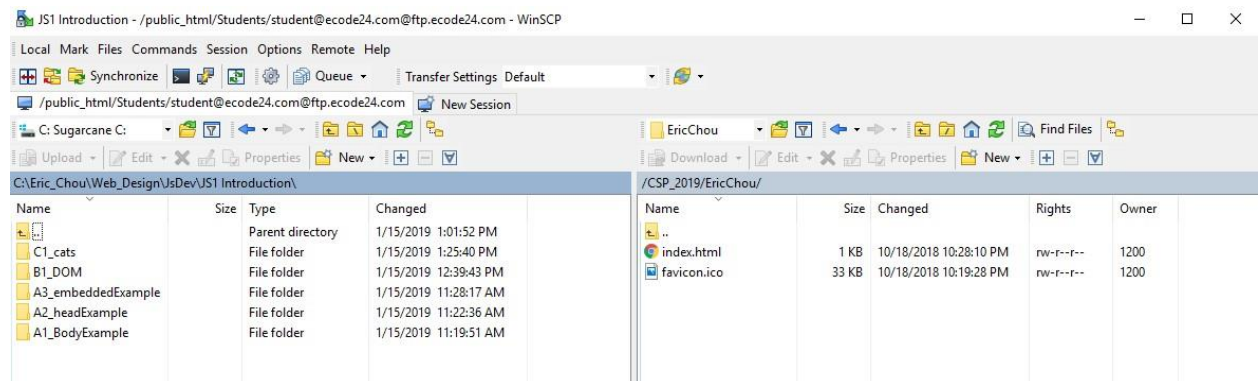

Put your project under a director using FirstnameLastName

For example, my first name is Eric, last name is Chou, Then, put under directory **EricChou**

Select the left-hand-side directory to be upload. In this example, it is C1_cats

Right side kept at **/public_html/Students/CSP_2019/EricChou**

Where **CSP_2019** is the course ID

- After uploading, you should be able to browse your own page by

http://www.ecode24.com/Students/CSP2019/EricChou/ProjectNmae/top_page_name.html

- A desktop shortcut should have been created for re-entry.
